

# ActiveArchives-on-the-Cloud with CPS Digital Pen

Improve Patient Care

Reduce Data entry

Instant Data Processing

## Write live, right now.

You can be up and running in days. There are no servers, no up-front capital costs, and no maintenance or administration costs. You enjoy the benefits of a full Laserfiche system, including the professional support of ActiveArchives, Laserfiche and Cambridge Connections, hosted in a proven, secure cloud environment.

CPS with Anoto Live™ forms digital writing solution makes mobile data capture and integration as simple as writing with pen and paper, allowing you to move hand-writing to computer and automate workflow in real-time.

Whether you intend to introduce a mobile data capture solution in the future or need to integrate your existing paper based processes, digital writing leverages your existing investment while simultaneously delivering the benefits of electronic data collection and processing. That is simple, and smart.

**Access your documents and records from any location in a secure hosted environment.**

**Use either the Laserfiche desktop client or Web Access. Connect from your PC, tablet or phone.**

**No server administration costs. Automatic backups, maintenance and upgrades.**

**ActiveArchives-on-the-Cloud with the CPS Digital Pen is Easy** - For a standard monthly subscription, a user receives a Digital Pen and software along with Laserfiche Rio named-user license, access to a secure Laserfiche repository running on a proven Cloud server architecture, 20 Gb of document storage, SSL encryption, server maintenance and backup, and access to over 200 training videos.
